STD-PSV-0106 Pressure safety valves (invented)

Revision 0 Engineering Standard (invented for testing)

1 Scope

This invented standard covers spring loaded pressure safety valves.

4.1 Back pressure

For a conventional valve, the built-up back pressure shall not exceed 10 % of the set pressure.

4.2 Set pressure

The set pressure shall not exceed the vessel maximum allowable working pressure of 12 barg.

4.3 Capacity

The relieving capacity shall be at least 1.0 kg/s.

4.4 Lining

Where an internal lining is specified, its thickness shall be at least 3 mm.

5.1 Orifice

The orifice designation shall be stated on the datasheet.

9.1 Pilot operated valves

A pilot operated valve shall have a pilot filter.
