## STD-HX-0104  Shell and tube exchangers (invented)

Revision 0  Engineering Standard (invented for testing)

### 1  Scope

This invented standard covers shell and tube heat exchangers.

### 4.3  Design pressure

The shell side design pressure shall be at least 12.5 barg.

### 5.4  Tube velocity

The tube side velocity shall not exceed 3.0 m/s.

### 6.1  Fouling

The fouling resistance shall be at least 0.0003 m2K/W.

### 6.4  Approach

The minimum approach temperature shall be at least 5 K.

### 7.2  Tube thickness

The tube wall thickness shall be at least 0.07 in.

### 9.2  Floating head

A floating head exchanger shall state the pull-through clearance.
